

20th November 2017

Dear Noritsu Professional Customers,

Noritsu is pleased to officially announce that Noritsu is continuing to manufacture Traditional Silver Halide (AGX) printers for Professional laboratories and Photographers alike.

Noritsu has never stopped manufacturing the Traditional Silver Halide printer and these machines have been the mainstay in the Professional markets for decades. Noritsu is committed to embrace Traditional Silver Halide technology and it has remained a popular choice around the world with a range of Professional customers.

Noritsu's world's best silver halide technology, Software and Traditional Silver Halide printers, deliver superior quality in terms of contrast, depth, and texture by emphasizing natural colors.

Noritsu has been made aware of concerns and rumours about the future production of Noritsu Traditional Silver Halide technology and would like to take the opportunity to declare that "Noritsu will continue to manufacture Traditional Silver Halide machines".

For further information on Noritsu Traditional Silver Halide machines, Inkjet Machines and the Noritsu software options please contact your local Noritsu agent.

Noritsu look forward to your continued support.

Yours Sincerely,

Tatsuya Hoshino
Representative Director, President
Noritsu Precision Co., Ltd.
